

| YOUR TOTAL COST ADVANTAGE

The Best Raw Material

Our mill is located in a premium Alabama poplar forest, allowing us to produce high quality, domestic panels.

Safe + Trusted

Made in the USA. We have delivered a consistent, sustainable, and rock-solid supply of hardwood products to OEM's and distributors for over 75 years.

Inventory Cost Savings

Our vertically integrated mills produce every type of hardwood veneer and we stock all major core types, allowing for just-in-time shipments that save you money.

All You Need On One Truck

Our flexible manufacturing equipment produces many types of hardwood plywood, including 4x8, 5x8, UV and raw veneer core.

Consistent Grade + Superior Quality

Our experienced workforce and modern equipment consistently deliver the high quality panels that the largest cabinet manufacturers in North America count on.

Helpful Problem Solvers

Our highly technical sales and operations teams are committed to helping you overcome your most difficult panel engineering and supply chain challenges.

Poplar Veneer Core

Hardwood Plywood
