

| YOUR TOTAL COST ADVANTAGE

The Best Raw Material

Our mill is located in the premier hardwood forest in North America, allowing us to produce veneer with better color and a smoother surface.

Safe + Trusted

Made in the USA. We have delivered a consistent, sustainable, and rock-solid supply of hardwood products to OEM's and distributors for over 75 years.

Inventory Cost Savings

Our vertically integrated factory produces every type of hardwood veneer and we stock all major core types, allowing for just-in-time shipments that save you money.

All You Need On One Truck

Our flexible manufacturing equipment produces all types of hardwood plywood, including 10', beaded, cross-grain, cut-to-size, bending and more.

Consistent Grade + Superior Quality

Our well trained workforce and state-of-the-art equipment consistently deliver the high quality panels that the largest cabinet manufacturers in North America count on.

Helpful Problem Solvers

Our highly technical sales and operations teams are committed to helping you overcome your most difficult panel engineering and supply chain challenges.
